

A little bit of magic

Meet an amazing item from Smiths Medical: the compact, reusable Capnocheck® Capnometer. Direct your attention to this mainstream device for fully quantitative monitoring of patient ETCO₂ and respiration rate. The Capnocheck® is simple to use and has no strings attached – no cables to get in the way. Among its many talents: this portable device is ready to perform; it has a precision digital readout; and it's sensitive, even when CO₂ output is low. With no need for routine calibration, the Capnocheck® Capnometer is a real crowd pleaser.
