

Mechanical Ventilation

*is a life-saving
procedure*

**Using securely attached
tubing for the delivery of
gases is extremely
important.**

Instrumentation
Industries, Inc.

Ventilator Tubing

is corrugated to prevent kinking, transparent, and non-conductive. It has a smooth internal diameter which promotes laminar gas flow, and resists the trapping of condensation.

- **Adult**
- **Pediatric**
- **Neonatal**

Available in **opaqued cuffed**, and **cuffless**,
or **transparent cuffless** in various lengths.

ISO 13485: 2003
